

# AKHMAD DANI MUNIF

Jakarta, ID | P: +62 85236160581 | [danimu.inbox@gmail.com](mailto:danimu.inbox@gmail.com) | <https://wakatime.com/@gaisuke>

Result-oriented Software Engineer with 5 years of professional experience specializing in building scalable backend microservices and dynamic frontend applications. Proven track record of delivering high-quality code independently within fully remote environments by maintaining proactive cross-functional communication. Proficient in Go and the React/Next.js ecosystem, with extensive experience driving engineering efficiency across fintech, aquaculture tech, and ERP systems.

## EXPERIENCE

---

### **Bank Rakyat Indonesia** (*State-Owned Bank*)

Jakarta, ID

*Software Engineer - CONTRACT*

Jun 2025 – Now

Contribute to the backend development of *Qita* by BRI, BRI's latest flagship mobile banking application, within the Investment Squad. Focus on designing and building scalable microservices supporting the bank's investment products while also assisting in coordinating development efforts within the squad.

- Develop and enhance backend systems to ensure secure, high-performance investment transactions.
- Collaborate closely with product managers, QA, and designers to align technical implementation with business goals.
- Participate in planning and reviewing development tasks to maintain delivery consistency and code quality.

Tech Stack: Go, MySQL, Redis, Kafka, REST, OpenShift, RabbitMQ.

### **Rakamin** (*Talent Development Company*)

Jakarta, ID

*Learning Mentor & Assistant Tutor - Programming/Software Development - FREELANCE*

Aug 2023 – Jun 2025

- Mentored 50+ students across Indonesia, including college students, fresh graduates, and ODP participants in top banks.
- Provided guidance in software development and industry practices.
- Acted as class advisor, tracking attendance, grading, and project support.
- Taught Java, Node.js, Express, Spring Boot, PostgreSQL, MySQL, React.js, Next.js, HTML, CSS, Tailwind, Docker, Nginx.

### **Moonlay Technologies** (*Information Technology Company*)

Jakarta, ID

*Software Engineer - CONTRACT*

Dec 2024 – Mar 2025

Develop and maintain scalable microservices in Go, handling high traffic for an *integrated trading platform*. Build responsive, type-safe front-end features with React and TypeScript, ensuring visual consistency using Shadcn/UI. Collaborate with cross-functional teams to deliver reliable, high-performance software solutions.

Tech Stack: Go, PostgreSQL, OKD, Keycloak, ReactJS, Typescript, Shadcn/UI.

### **eFishery** (*Aquaculture Tech*)

Bandung, ID (Remote)

*Software Engineer – FULL TIME*

June 2022 – Oct 2024

Worked across both frontend and backend development to build and maintain user-facing applications and scalable backend services supporting marketing and referral initiatives. Key contributions include:

- *Promo Dashboard Development (Fullstack)*: Led the development of an internal dashboard enabling bulk creation and management of nationwide promotions. Implemented backend services to process CSV uploads and manage promo data efficiently, while also crafting a user-friendly interface for campaign oversight.
- *Referral Dashboard and Onboarding (Fullstack)*: Built a responsive dashboard for referral tracking and user onboarding. Developed backend logic to handle referral data processing and frontend components for a smooth user experience.
- *Promo & Referral Integration (Fullstack)*: Collaborated on integrating promo systems with referral flows, including backend automation of promotion issuance tied to referral activities, improving operational efficiency.

Tech Stack: Go, PostgreSQL, React, NextJS, Typescript, Refine, Vite, TailwindCSS.

### **Sunatha Putra Mandiri** (*IT Consultant*)

Jakarta, ID (Remote)

*Frontend Web Developer – FREELANCE*

Oct 2021 – June 2022

Developed and maintained the client-side infrastructure of a custom Enterprise Resource Planning (ERP) application.

- *Built features based on system analyst requirements to meet complex enterprise business needs.*
- Ensured a smooth, highly responsive interface optimized across all screen sizes and mobile devices.

Tech Stack: ReactJS, MaterialUI, Typescript, Webpack, TailwindCSS, API Integration, Swagger.

### **MatchKerja** (*All-in-one Career Services*)

Jakarta, ID (Remote)

*Frontend Web Developer - FREELANCE*

Feb 2021 – August 2021

Re-engineered the platform's core web appearance from a legacy template into a fully customized web application.

- Migrated template-based designs into custom, reusable React components tailored to specific business needs.
- Collaborated closely with cross-functional business teams to transform operational requirements into functional code.
- Integrated backend APIs and data streams with frontend layouts to deliver a cohesive, responsive user experience.

Tech Stack: ReactJS, MaterialUI, Laravel, Blade Templating, Alpine, TailwindCSS, Livewire, MySQL.

## PROJECTS

---

### ProfX – AI-Powered Job Screening Evaluator

[github.com/gaisuke/profx](https://github.com/gaisuke/profx)

An open-source backend service that automates candidate evaluation by analyzing uploaded CVs and project reports to determine job-fit criteria.

## EDUCATION

---

### Jember University

*Jember, ID*

*Bachelor of Computer Science; Major in Information System*

*Jan 2022*

- Cumulative GPA: 3.58/4.0; Bidikmisi Scholarship (2016-2020).
- Programming mentor for junior year student (3 times, 2017,2018,2019)
- Related coursework: Algorithms and Data Structures; Object Oriented Programming; Web Programming

## ADDITIONAL

---

**Programming Language and Framework:** Go, PostgreSQL, PHP, Laravel, HTML, CSS, JS, TailwindCSS, React, Typescript, NextJS, Livewire, Sass/Less, Bootstrap, NodeJS, ExpressJS.

**Languages:** Fluent in English; Native Speakers in Bahasa Indonesia

**Certifications & Training:** eFishery Academy - Software Engineer Golang (eFishery, June 2022); Problem Solving Basic (HackerRank, Mar 2022); Online Frontend Coding Training (Progate Indonesia, Nov 2020)
